Qualifying advanced smart thermostats must:

1. Be listed on BPA's Smart Thermostat Qualified Products List;
2. Have occupancy detection set to "on"; and
3. Be set to the geographic location where the thermostat is located.

In addition to the requirements above, thermostats controlling ASHPs must be programmed to recognize the existing heat pump system.

Thermostats that control cooling-only systems or dual-fuel heating systems (gas furnace and electric heat pump) are not eligible for an incentive.
