

# MAIN STREET CORRIDOR

**How can Main Street be improved for the benefit of the public and to spur economic development?**

**Improvements in the corridor will require both public and private investment. Public investment depends on grant funding. A good plan backed by the public will help the city be more competitive for grants.**

## What's Happening?

The City of Centralia won a Thriving Communities Grant that provides technical assistance to advance our Hub City Greenways vision. Main Street is the spine of the HCG trail system.

In 2025-2026 the City will be engaging the public to develop a plan for Main Street, including streetscape improvements, a visual gateway to Centralia College and other strategies and actions.

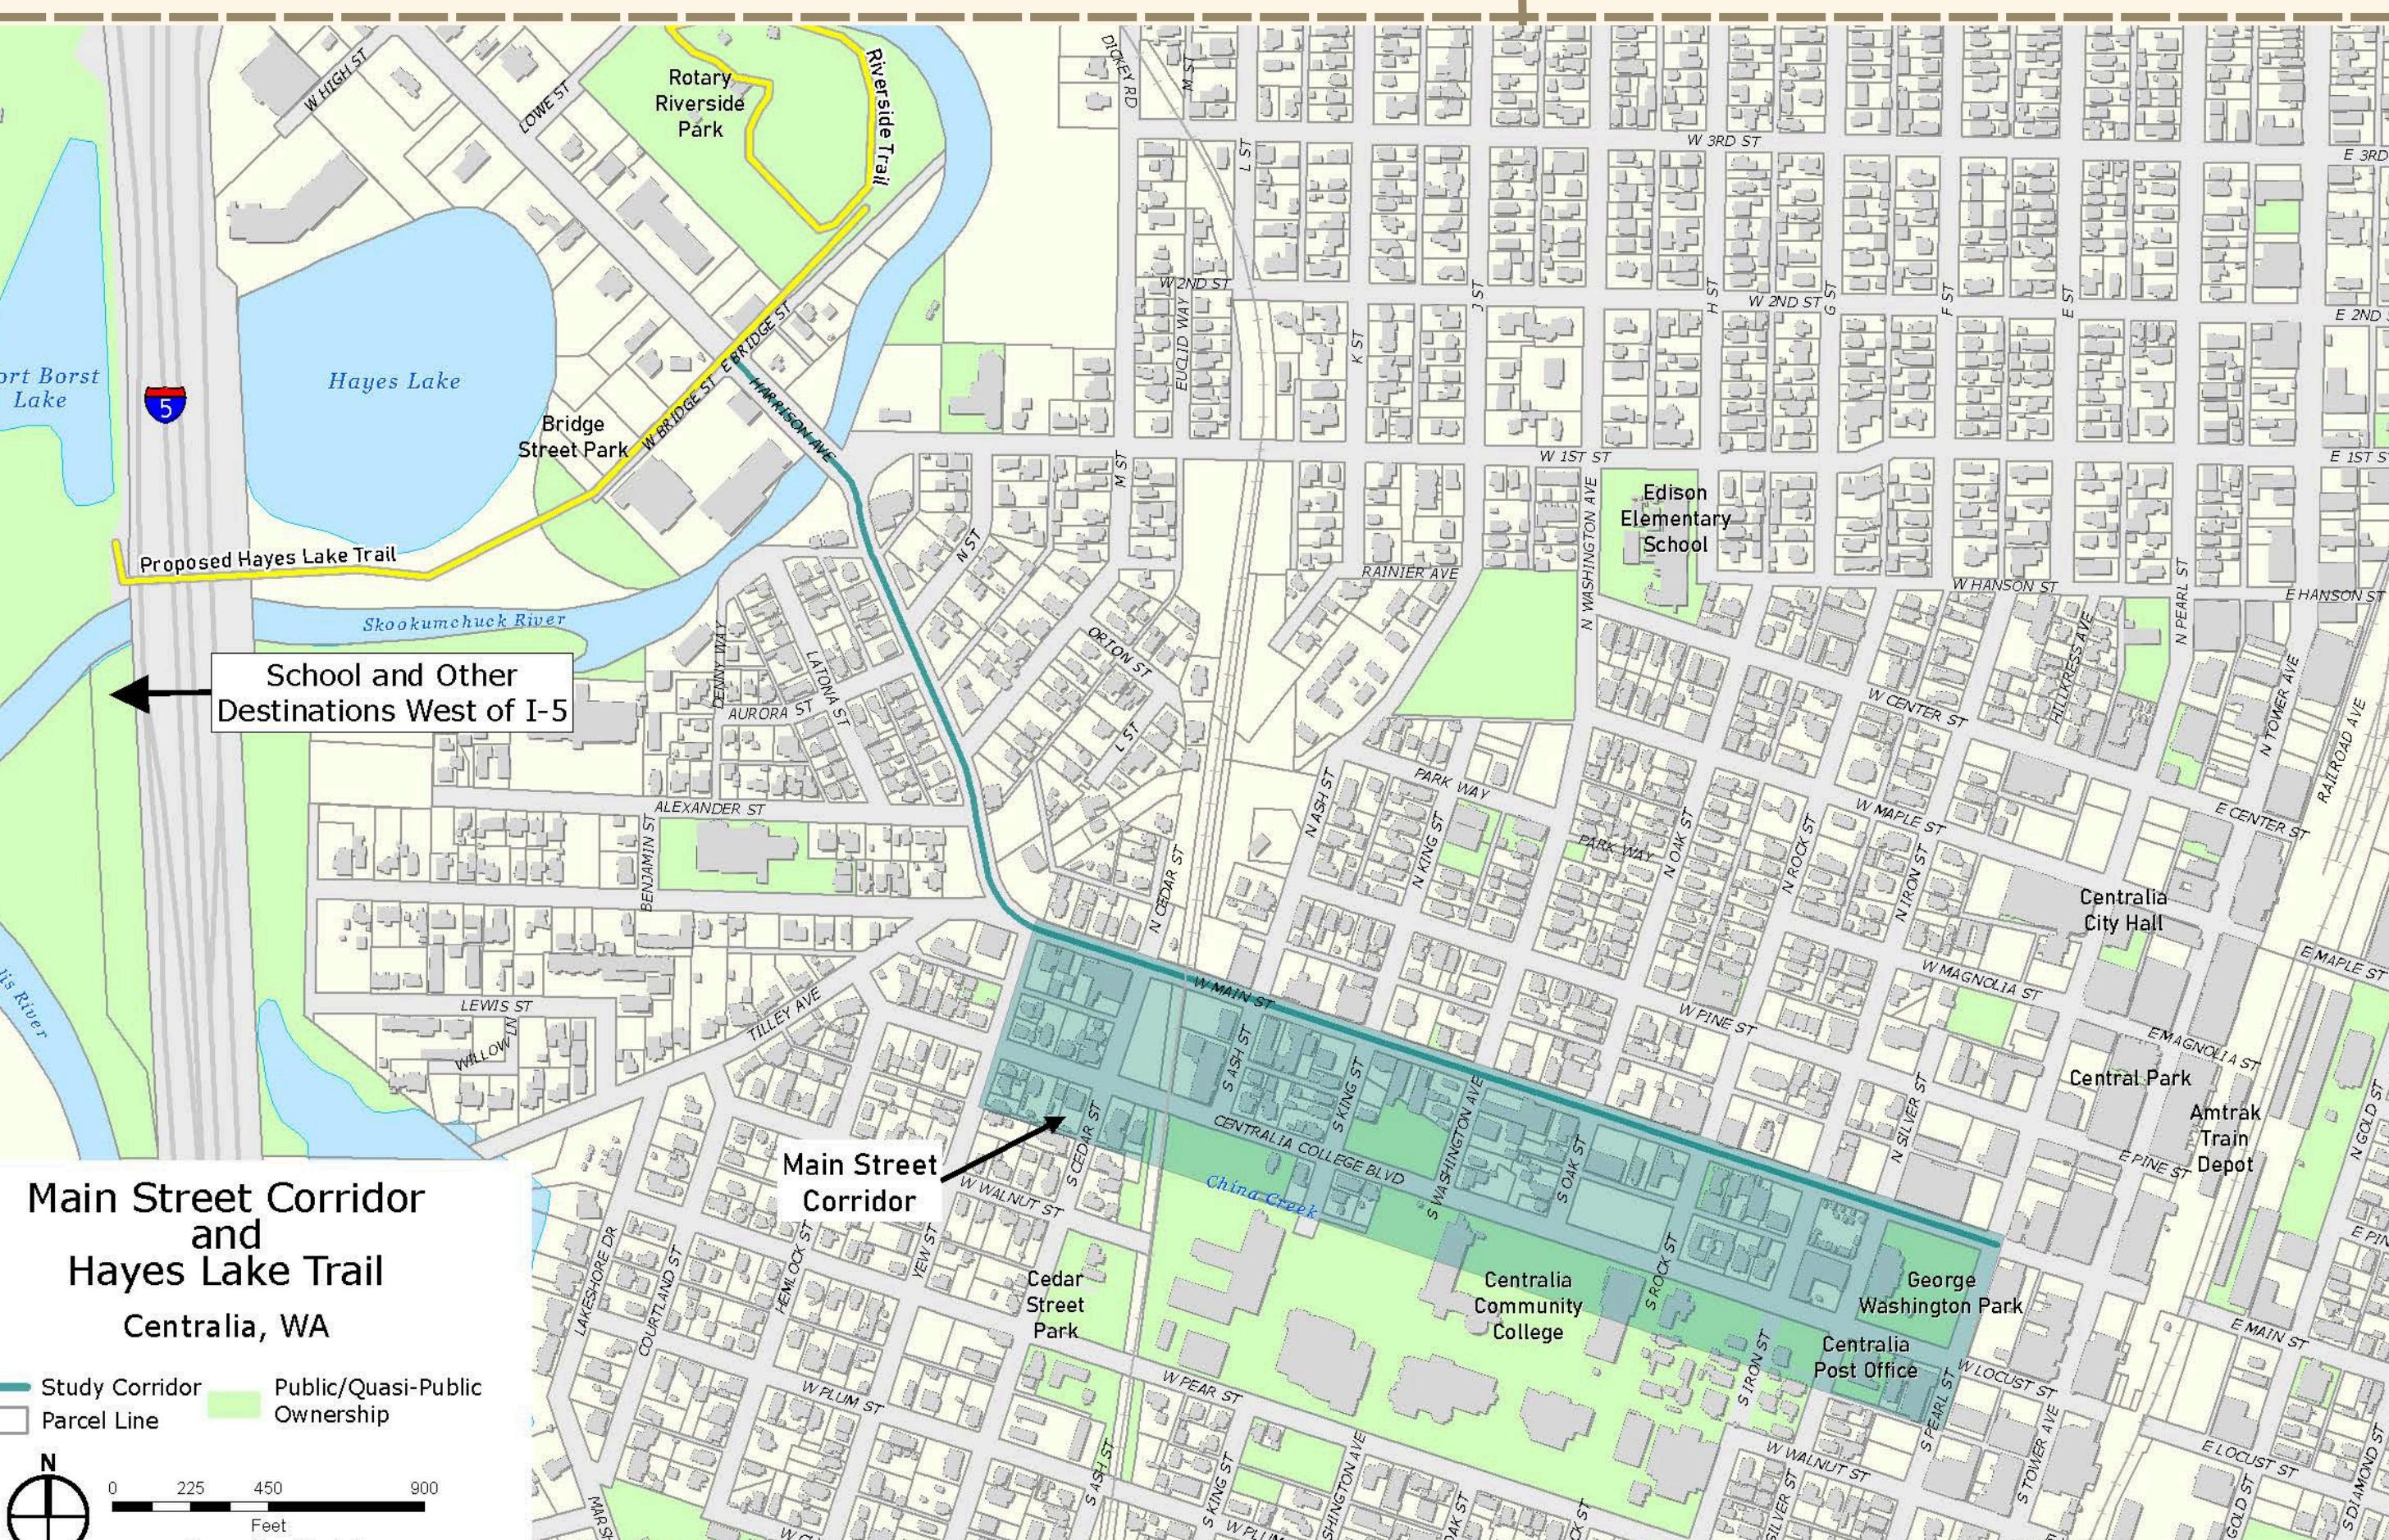

As part of the process the grant will also pay for a market study to better understand the commercial and real estate development opportunities in the corridor.

Watch for surveys and meetings in the future so you can share your ideas.

**Establishing a vision for Main Street is the first step to creating a more vibrant corridor.**

## Timing

Public Engagement & Planning  
2025-2026

Implementation  
2027+

Improvements will occur overtime as opportunities arise.
